RATIONALE

Why does parent involvement make a difference?

Decades of research show that when parents are involved students have:

- Higher grades, test scores, and graduation rates
- Better school attendance
- Increased motivation
- Higher self-esteem
- Lower rates of suspension
- Decreased use of drugs and alcohol
- Fewer instances of violent behavior
- Communication

Did you know?

Family participation in education was twice as predictive of students' academic success as family socioeconomic status.

Parent Expectations count too!

A study completed by the Department of Education in 2001, found that parent expectations played an important role in their child's positive academic achievement and social adjustment in school.

HOME LEARNING ENVIRONMENT

Tips and strategies you can use at home with your child!

- Encourage your child to read
- Provide opportunities for discovery (cooking together, board games, nature walks, zoo trips)
- Establish a nightly routine for school talk, homework, bed, etc.
- **Limit the amount of time for TV and video games after school - no more than 2 hours/day is recommended for school-age children.**
- Check your child's backpack daily
- Provide a quiet place and resources (books, paper, pencils, crayons) for completing homework. Offer assistance when needed.

The most effective forms of parent involvement are those, which engage parents in working directly with their children on learning activities at home.
